- Certification platform = the bSI b-cert platform. Platform access is provided for all service options
- Export certification options = Arch, MEP, Structural
- Only one discount may apply
- Discount 1 applies for the first 5 registered applications after money reached the bSI accounts, first in first serve.
- \*) Platform access includes access to the certification platform with test instructions, calibration files as they become available by export certifications and automated testing-tool. **This option does not include any support or auditing for certification!**
- Import-, Export- and Import and Export-Certifications include platform access, support and the auditing for the certification.
- **For eventually necessary re-runs through the audit, if an implementer failed in specific test-cases, the required effort will be invoiced based on € 80,00 per hour. This can easily be avoided by the implementers, if they test their applications thoroughly by themselves.**
